Mariner Planter Size and Pricing Overview

DeepStream Designs builds all of our planters to order, and we can build almost any size from 18"–72" long and 12"–60" wide. We stock three standard leg heights: 21", 31" and 42". We also have a T-leg which we use to build multi-section planters when larger sizes are needed.

We can build planters in a variety of materials, from solid tropical hardwoods (Jatoba, Ipe and Cumaru) to Recycled Plastic Lumber (RPL - 12 colors) to stone laminates, copper and resin panels.

The table below shows budget pricing* for our 15 stock sizes (price includes liner and drain filter pack). We offer a 5% discount for 5-9 units, 10% discount for 10+ units.

Planters made with Recycled Plastic Lumber are typically less expensive and require almost no maintenance.

Our products are designed without any paint or powder coating to fail, and we back our planters with a **LIFETIME STRUCTURAL WARRANTY**.

**BUDGET PRICES are subject to change without notice.*

Updated 7/1/24

For budgeting, our multi-section planters with a 21.5" height run approximately \$325-\$375/linear foot including commercial-grade molded plastic liners. For a 31.5" height, add approx. 15-20%.

Our planters will last for decades, offering the lowest cost of ownership over time, and are designed so that they can be disassembled in future years to have parts replaced, should that be necessary – they won't rot away like traditional wood planter boxes.

We find that most projects we quote are for custom sizes, so if you send us the sizes, quantities and finish you are looking for, we'll be happy to put together a quote for any project you are working on.

Planters are also available with casters, security clips, trellis attachments, and screen wall.
